Lombok

Array
Collection
Generic Collection

using . system . collection ;

to use collection .

ArrayList list = new ArrayList () ;

to add item in ArrayList
list . Add ("john") ;

ArrayList is dynamic and
if ~~we~~ add one value its size will
become 4 and it will get doubled.

list.capacity() → TO see the capacity
of the ArrayList

list.trimToSize() → TO trim
unwanted or unused space in the
ArrayList.

ArrayList accept multiple datatype

like
list.add(1); → store in 0
list.add('9'); → store in 1 index
list.add("Hello"); → store in 2
list.add(true); → store in 3
list.add(4); → store in 4

list.remove(2, "Hello") → to store in
a specific index. → value.
index ~~value~~

list.remove("John") only remove
but John in the ArrayList.

list.removeAt(0) → remove by index
list.removeRange(0, 3) → remove
0 to 3 index
~~removeRange(0, 3)~~

String[] value = { "Hi", "Hello", "World" };

~~ArrayList~~

list.add(0, value);

ArrayList list = new ArrayList(10);

it will have 10 space in list

starting index

ArrayList list = new ArrayList() {

{ "Hi", "A", 1, true }

it will add to ArrayList

list.clear();

it will clear the list.

var → similar to dynamic type.
