gradient Colour

```
< StackPanel . Background >
    < LinearGradient Brush   StartPoint = '0,0'
                             EndPoint = '1,1' >
    < Gradient stop   Colour = "green"   offset = "0,0"
```
↓ for color spread

< > < /Gradientstop >
if we give same object
to two gradient stop
It will make the (Pre.?)

```
    <   >
<   >
```

```
<Setter  Property = "curser"  value
                            = "Hand" >
```
↓
Change curser design!
when mouseover

```
<Style . Triggers >
    <Triggers Property = "is mouseover"
                         value = "True" >
```

Between Row.

```xml
<Setter property = "Template">

  <Setter.value>

    <ControlTemple Target type = button>

      <Border .corner Radius = "10"
              BodevBrush = "Transparent"
              Border thickness = "1"
              Background = white >

        <Content persentent
                 Horizontal Alignment = "center"
                 Vertical Alignment = "center">

          <Border.effect >

            <dropShadoweffect = Shadepth
                              = 3
                              BlurRadius = "10"
                              direction = 90
                              colour = white >

  </ >
  </ >
  </ >
  </ >
```
