String no[] name = ["hollo", "world", "me", "you"];

Foreach

```
foreach (string item in name)
{
    console writeline (item);
}
```

new variable

↪ Foreach is used when condition is not need.

↪ when we don't no the type we can we object type here.

Radio Button alternative is
Best wor more orierd "comobox";

checkBox alternative is "list box".
Best book ← deleting multiple item.

• insert → to add item in mopified position
