Day 69

22/05/2025

```
Proteced Dataset   getdataset (String sql)
{

    SqlConnection conn = new SqlConntion.()
    conn.open()
    SqlCommand cm = new Sqlcomd (q,c)

    SqlDataAdapter SQLAD = new
                        SqlData dapter (cm)

    Dataset datset = new()
    sqldatai.fill (datset);
    connection.Close()

    return datset.
}
```

dataset (or) List.

Public datset getdata () -> logic

↓

String query = Select * from users.

creturn getDatset (query)

Data

logic.

cmb. itemsource = b1. getdata ().

Tables [0]. default view;

cmb. item displaymember = "name",

cmbitem. relecti4 memberparh = "age";

} -> Business logic.

Pubulic Dataset data ()

returns getdata

update - dropdown.
