Day 22

To get Temp Path

```
String Path = Path. Get Temp Path()

String Folder = Path + "// Folder";

String File = Folder + "// File.txt";

String Floder = Path. Combine( Path,
                                "Folder");
```

↳ for combineing more Path in Path.

```
String AppData = Environment.
    get folder path (Environment
    . Special Folder. Application
                                Data)
```

To get specific Path on the folder.

```
String Folder = Path. Combine ( AppData,
    "Folder1", "Folder 2");
```
